

**Derek Ackerly**, Farrier (Indiantown, FL) All seven of my horses are on your supplement. Since they have been on the **Power Horse**, I have noticed more hoof growth and a thicker hoof wall. My horses now have better support and, I have a lot more hoof wall for nailing on shoes. I recommend your product to all of my customers. **Power Horse** makes my job easier and my customers happier. Thank you.

**Cherrick Arabians** (CA) claims that addition of trace minerals to diet produced healthier and stronger foals as evidenced by shinier coats and stronger hooves. One became a state champion (Bey Shadena) and placed fourth in the Nationals.

**Dean Kunz** (Rexburg, ID) of Ricks College (now BYU) carried out tests in which five racehorses were fed one ounce of *Montmorillonite* per feeding, over a one-month period. Researchers found that in all horses, the red blood cell count increased from an average of 11.8 million to an average of 16.5 million. The red blood cell count is an indicator of

the oxygen-carrying capacity of the blood, which determines muscle efficiency and stamina.

**H-Bar-H Ranch** (Phoenix, AZ) after one month of adding **PANAK-ITE** to their diet, his horses noticeably had gained weight allowing a considerable feed reduction and savings. Even the dullest coat during the same time period would develop a sheen and a finer texture. Sickly, skinny colts were administered **PANAKI-TE** and within a matter of weeks had “blossomed out”. To one colt with an injured leg and quite a bit of swelling was a poultice administered and after a few days and repeated applications the swelling went away completely.

**Jack Wollenzein** (Afton, WY) indicates he has been feeding his horses the **PANAK-ITE** for some time and believes he has worked out the ideal formula. For adult horses he feels that 1.5 oz. per day will maintain their blood count at 16 million and reduce feed requirements, particularly of rolled oats, by ½. Also, states that he noticed easier deliveries for mares who had given him trouble prior to taking minerals regularly.

**Robert Sonner**, *Horse Country* (Miami, FL) I am a Registered Clydesdale Breeder and am all too familiar with the problems that these big animals have. Over the years I have tried many different products, in efforts to increase bone density, harden hoof material and improve the overall health of my horses. For three years now I have used your **POWER HORSE** product and have had nothing short of excellent results. [www.montmorillonite.biz](http://www.montmorillonite.biz)
